

The XXVII World Congress and International Vulvovaginal Disease Update will be a **live event**. Your scientific registration includes networking events, access to online recordings of all sessions for (3) three months and one ticket to the social event at Ljubljana Castle (for the first 550 registrants). You may purchase an extra ticket for guests for \$85.

You may choose to register for a virtual option at the time of registration, using the same [registration link](#). We appreciate you keeping us informed if you change your registration type (virtual vs live) so that we can ensure space for everyone who wishes to attend the live event and so we do not waste food/beverage on no shows.

If you choose the virtual option you will receive an email after the live event offering you access to an online virtual platform to view the recordings for up to three months after the event.

The virtual option will be available one week after the live event and will offer you access to the online platform which will include all the recorded lectures and any additional content provided by speakers, etc. Hands on workshops will not be recorded and are therefore not available for purchase but may be available at a later time on issvdcourses.com.
