3:20-3:30	Break	
3:30-3:55	Hidradenitis Suppurativa	Lynne Margesson
3:55-4:45	Your Diagnosis Is?	Edwards, Haefner, Margesson
4:45-5:00	Post Test/Wrap-up	Libby Edwards

Learning Objectives

Upon completion of this course, participants will:

- Increase their current knowledge of vulvovaginal conditions
- Recognize the normal and abnormal anatomy of the vulva and vagina
- Gain awareness of the pathophysiology and treatment of benign vulvar conditions
- Understand the multiple contributions of the wet mount and be able to associate various vaginal conditions with their wet mount appearances
- Recognize and treat resistant vulvovaginitis
- Recognize the association of chronic vulvar dermatoses and vulvar intraepithelial neoplasia and squamous carcinoma
- Understand what is known about desquamative inflammatory vaginitis and atrophic vaginitis
- Gain insight into dermatoses of the vulva
- Have knowledge of treatment for pruritic conditions of the vulva
- Become more comfortable evaluating vulvar ulcerative conditions
- Understand the diagnosis and treatment of vulvar pain
- Gain understanding to how pelvic floor myalgia or vaginismus contributes to vulvar pain and sexual dysfunction
- Test their knowledge of various vulvovaginal diseases with lectures, cases and question and answer sessions
